

Documentng Artwork : Hotspots and Keystoning,

Shoot hotspots from two or more angles - at least one straight on if you want to document the mat & frame.
Copy keystoned image and set guides to corners, then transform.

Paste over front view, then adjust height and width.

Adjust colors, etc as you wish (best done when you can view original work so you don't overcorrect.

Note: for submissions to juried shows, eliminate the frame and mat.
